Internet Acceptable Use: Filtering

Common Ground High School is fortunate to have access to the Internet at all schools. This access provides increased opportunities for students and staff to conduct research and to communicate locally, nationally, and internationally.

This wonderful resource also provides access to material unsuitable for students and which has no educational value. It is the responsibility of all District staff to ensure that the Internet, as used in District Schools, is appropriately guided and monitored. Moreover, staff also has the responsibility to conduct themselves in an appropriate private manner when using the Internet.

Alternative/optional language to consider

The Board of Education provides computers, computer systems, software, electronic access privileges, and networks for students and staff to carry out the mission of the Board in an environment which ensures access to up-to-date information, management, and communication services. Responsible use of these systems and networks is expected of all students and staff.

The computers, computer systems, software, electronic access privileges, and networks are the property of the Board of Education and are to be used only for those activities directly related to teaching, learning, and/or management by students and staff. The equipment, infrastructure, and software are not to be used for personal gain by any student or staff member.

In order to ensure that the District's Internet connection is used in the appropriate manner and that all users are protected from any inappropriate information published on the Internet, the District has and is continuing to implement the following:

1. Professional development opportunities to help teachers integrate the use of the Internet into classroom teaching.

2. Use of the computers, computer systems, software electronic access privileges and networks shall be restricted to those users who have signed the District's "Acceptable Use Policy." In the case of minors, the "Acceptable Use Policy" must also be signed by the student's parent or guardian.

3. Implementation of a system developed to filter out Internet sites with content considered unacceptable for student viewing. A committee of teachers, parents, and administrators shall be used to receive appeals from users who have a specific use in mind for a filtered site.

The Internet changes rapidly making it impossible to filter all objectionable sites. Therefore, the staff role in supervising and monitoring student access to the Internet is critical. In addition, each individual has the responsibility to monitor their own navigation on the Internet to avoid undesirable sites.

Procedures For Suggesting Site Be Blocked or Unblocked

If District staff members observe a site which they believe to contain inappropriate material according to the criteria provided here, they may request that the site (URL) be blocked. Education Technology staff will review the site for inappropriateness. If the site meets the criteria for filtering, steps will be taken to block the site.

Disabling Blocking/Filtering Devices

The technology protection measures used to block or filter a site may be disabled during use by an adult to enable access to bona fide research or other lawful purpose. (**NOTE:** *CIPA does not require schools or libraries to afford adults unfiltered Internet access.*)

There are no exceptions to the requirement that Internet access be blocked/filtered at all times for minors. If material has been wrongly blocked, it must be unblocked by the company providing the software, after a request has been made by the school or library.
