

COMMON GROUND
NEW HAVEN ECOLOGY PROJECT, INC

Cultivating habits of healthy living and sustainable environmental practices within a diverse community of children, adults, and families.

**Pesticide Policy for
Common Ground High School & The New Haven Ecology Project
2.12.01**

Common Ground High School and the New Haven Ecology Project share the same philosophy and goals as they relate to the use of chemicals as either pesticides or agriculture inputs. That policy is:

Any product of chemical that is introduced onto the campus must meet the requirements of the northeast Organic Farming Association (NOFA).

All chemicals and inputs must be cleared with a staff committee consisting of the School Director (or appointee), Farm Manager and Executive Director (or appointee). No spraying or application that could have implications for people or crops may be used at any time without prior committee approval.
